Thüringische Flussspatwerke	Gehren (J-33)	24	25,000
" "	Ilmenau	32	25,000

3. Source points out that the first thirteen enterprises listed above are located in Saxony-Anhalt while the last four are in Thuringia. Thus it is apparent that the new organization is intended to withdraw the important socialized enterprises from the jurisdiction of the individual states and subordinate them to a central office. The headquarters of the associations (Vereinigungen) may be located in various cities, but all the associations of a particular branch are under the supervision of a single office in Berlin called "Vereinigung der volkseigenen Betriebe der Industrie in der sowjetischen Besatzungszone" (Association of the Publicly-owned Enterprises of the Industry in the Russian Zone). The latter functions as a holding company for these enterprises and is directly subordinate to the corresponding branch of the DDK. It is believed that final technical and financial control of all the publicly-owned enterprises administered by the DDK will be the job of the "Hauptverwaltung Kontrolle des Volkseigentums", a separate section of the DDK headed by Dr. Lange, formerly chief of the Central Sequestration Commission.
4. Source states that Fritz Selbmann had told a conference in Dresden on 15 March 1948 that the publicly-owned enterprises were to be grouped in combines (Kombinate) which would cover the production process from raw material to finished product. The new organization in associations does not conform to this proposal; it is not known whether Selbmann has had to abandon his intention.
